Estrella 100

LED Downlight

Estrella 100

Engineered for flawless illumination, precision, and long-lasting durability, this versatile fitting is designed to meet the demands of both professional and residential spaces. Featuring a range of beam angles — 15°, 24°, 38°, 45°, and 60° — it offers targeted lighting for a variety of applications, whether for accent, general, or task lighting. With IP65 or IP20 ratings, this fixture ensures reliable performance even in challenging environments, whether exposed to dust, moisture, or varying temperatures.

Crafted from high-quality die-cast aluminum, the fitting's robust construction guarantees lasting performance while its sleek reflector design enhances both function and style. Available in a range of elegant finishes, including Matt White or Black trim, as well as luxurious options like Matt Black, Gun Black, Gold, and Mirror, it seamlessly blends with any interior design, adding a touch of sophistication to your space.

Designed with longevity in mind, the smart cooling system is equipped with a specially engineered aluminum heatsink featuring vertical fins. This allows for efficient airflow both upwards and downwards, keeping the fixture cool even during extended use. An external power supply ensures optimal performance and ease of maintenance, making this fitting as reliable as it is adaptable.

High efficiency and energy saving

The Estrella 100 is a versatile recessed LED downlight designed to perform reliably in diverse environments with an operating temperature range of -20°C to 45°C. and IP Rating of 65 where required.

Featuring a range of beam angles — 15°, 24°, 38°, 45°, and 60°, the Estrella 100 offers targeted lighting for a variety of applications, whether for accent, general, or task lighting. It reduces harsh shadows providing a more uniform and comfortable lighting effect.

Intelligent lighting control options

All versions of the Estrella 100 can be installed with either DALI or 1-10v Dimming. Smart integration with building management systems ensures energy optimization, while app-based controls offer convenience and remote access.

Glare controlled downlights

High-quality illumination with glare-controlled downlights, designed to reduce visual discomfort and enhance focus.

These fittings utilize advanced optics and low Unified Glare Rating (UGR) designs to ensure even light distribution and minimize harsh reflections. Ideal for offices, retail spaces, and hospitality environments, glare-controlled downlights provide a balance of brightness and comfort, promoting productivity and creating an inviting ambience.
